

SUJIT KUMAR

Senior Product Designer | UX/UI Designer

ktsujeet1997@gmail.com | +91 92884 98199 | sujit-folio.vercel.app | linkedin.com/in/sujitkt

PROFESSIONAL SUMMARY

Senior Product Designer with 5+ years leading 0→1 and scale-stage product strategy across Enterprise SaaS, ERP/logistics, and IoT platforms. Pairs product discovery and UX research with design-systems thinking to turn complex operational workflows into intuitive, scalable products, using AI-assisted research synthesis and rapid prototyping to move faster without losing design rigor. Contributions have supported ₹7Cr+ in platform business impact across 50+ enterprise brands and 5M+ users. A background in accounting sharpens how business logic shapes interface decisions; partners directly with founders and engineering to ship outcomes, not just screens.

CORE SKILLS

Product Strategy & Discovery • UX Research & Usability Testing • Design Systems (Atomic Design) • Information Architecture • Interaction & Visual Design • Enterprise SaaS & ERP Workflow Design • IoT & Embedded UI • Accessibility (WCAG) • A/B Testing & Data-Informed Design • AI-Assisted Product Discovery • AI-Enhanced Prototyping • Cross-Functional & Stakeholder Collaboration • Design Mentorship • Figma & Rapid Prototyping

EXPERIENCE

PixelDecode

Senior Product Designer

Jan 2026 – Present

- A smart-home IoT client needed touch-panel and mobile control that felt like one product, not two; designed a unified interaction language within embedded hardware constraints and partnered with firmware teams from day one — cutting integration timeline by 75%.
- A SaaS client's accounting-firm operations ran across 6–7 disconnected tools; diagnosed operational fragmentation (not accounting complexity) as the root problem and architected a single connected operating system with role-based permissions and automated workflows to replace them.
- Serve as embedded product design partner across confidential B2B SaaS, AI, and IoT engagements, owning the full lifecycle from discovery to developer handoff and building reusable design-system foundations to speed delivery.

Cooter:Labs — LodgEdge Pristine Logistics

Senior UX/UI Designer (Contract)

Apr 2025 – Dec 2025

- Research surfaced usability issues affecting 70%+ of surveyed users across logistics ERP workflows; prioritized top friction points over a full rebuild, restructuring IA and task flows to cut redundant manual steps within a fixed contract timeline.
- Built and scaled a modular design system on Atomic Design principles, reducing design-to-dev handoff time and driving consistency across the platform.
- Ran agile design sprints with product, engineering, and business stakeholders to keep dashboard and workflow redesigns aligned to technical and business constraints.

O4S — B2B SaaS Channel Loyalty Platform

Product Designer

May 2023 – Mar 2025

- Owned end-to-end design for a white-label loyalty platform (mobile + enterprise dashboard) across 50+ enterprise brands and 5M+ channel partners — contributions supported ₹7Cr+ in platform impact and 25% YoY growth.
- Identified high drop-off in a long-form onboarding flow; split it into three sections with save-and-resume based on user-interview insights, validated via A/B testing, and secured stakeholder buy-in before rollout.
- Mentored junior and peer designers through structured reviews — 3 of 4 external mentees now work as professional designers — and ran accessibility audits that reduced onboarding time and downstream dev rework.

Earlier Experience

UX/UI Designer, Oodles Studio (Apr 2022 – Apr 2023): Delivered end-to-end UX across waste-management, ed-tech, and e-commerce products, adapting research approach per domain and prioritizing highest-drop-off flows under tight timelines.

UX/UI Designer, JoonWeb (Oct 2021 – Mar 2022): Designed wireframes, UI systems, and reusable interaction patterns directly with founders and developers in an early-stage startup environment.

EDUCATION

Bachelor's Degree — Babasaheb Bhimrao Ambedkar University

CERTIFICATIONS

Google UX Design Certificate
